

Software Requirements Specification (SRS)

Nazoru Mobile Application

1. Introduction

1.1 Purpose

This document describes the Software Requirements Specification (SRS) for the Nazoru mobile application, following the IEEE 830 standard.

1.2 Scope

Nazoru is a mobile application that allows users to trace drawings using their phone by overlaying an image on top of the camera feed.

1.3 Definitions

AR Lite – Simple augmented overlay without spatial tracking.

HUD – Interface overlay.

2. Overall Description

2.1 Product Perspective

Nazoru is a hybrid mobile application built with Ionic Vue and Capacitor, connected to a NestJS backend.

2.2 User Characteristics

Users include artists, students, and beginners.

2.3 Constraints

Requires camera permissions and Android 8+.

3. Functional Requirements

RF-01 User registration

RF-02 Login

RF-03 Guest access

RF-04 Image selection

RF-05 Camera activation

RF-06 Overlay image

RF-07 Opacity adjustment

RF-08 Lock image

RF-09 Mirror mode

RF-10 Flash control

RF-11 Scale/move image

RF-12 Logout

4. Non-Functional Requirements

RNF-01 Usability

RNF-02 Performance

RNF-03 Security

RNF-04 Compatibility

RNF-05 Availability

5. User Stories

As a user, I want to register...

As a guest, I want to access directly...

As an artist, I want to adjust opacity...

6. Architecture

Frontend: Ionic Vue

Backend: NestJS + Prisma

Database: MySQL

Android: Transparent camera theme

7. Database

User table: id, name, email, password_hash

8. Flow

Home → Register/Login/Guest → Explanation → Select Image → Camera Overlay

9. Conclusions

Nazoru achieves its goal of acting as a portable camera lucida for drawing.
